

Job Description

Be it locally or globally, **Blockchain** is in the process of revamping the 13 trillion dollar financial ecosystem.

Crowdnext is searching for a well-rounded **Blockchain** Evangelist, who not only is passionate about **Blockchain** but also endowed with an innovative mind to strategize technology architecture catering to our wide range of solutions.

In this role, you will help drive Crowdnext Blockchain Innovation Centre in partnership with the Redclays Capital

If you are an insightful mind with a deep knowledge of cryptocurrencies and is keen on developing a community around it, this might be the role for you.

Key Responsibilities Areas:

Be a **Blockchain** evangelist while maintaining hands-on experience to effectively execute POCs/lead technical teams. Produce thought leadership and be involved in both writing/speaking engagements
Represent Crowdnext **Blockchain** events and meetups organized locally as well as globally
contribute towards business growth through technological advisory and development
Supervise the research work. Provide innovative solutions to build and drive client systems.

Desired Skills:

Bachelor or Masters degree in Computer Science, Engineering, Mathematics, and/or equivalent work experience.

Strong understanding of algorithms, data structures, cryptography and data security

2+ years hands-on experience with **Blockchain** technology or related cryptographic research

Experience developing Ethereum contracts with Solidity

Has been involved in projects that had one or more of the below components:-

- 1) ICO specific wallets.
- 2) Multilayer Wallet for the new ICO
- 3) **Blockchain** Explorer
- 4) Self-hosted Cryptoexchange

Prior experience in engaging communities is an advantage.

Candidate with relevant financial analysis software, trading software experience is preferred.

Candidate with a technology blog with open source project development experience is preferred.

Experience in handling self-driven side projects is a plus.
